Clorexyderm® oto più

Dr. Baddaky®

Clorexyderm® oto piu

Earcleaner for dogs and cats

Active ingredients:

Chlorhexidine: 0,06%.

Lactobionic Acid: a polyhydroxy acid of a new generation, composed of Gluconic Acid plus Galactose, molecules physiologically present in the skin. This makes Lactobionic acid highly compatible with the skin, highly tolerated and non-irritant.

The numerous hydroxyl groups give a direct and very effective moisturizing effect due to retention of water, superior to other skin humectants. It hydrates and relieves itching. Due to its chemical structure, it is effective in regulating the process of keratinization and promoting skin turnover.

Lactobionic acid has significant antioxidant properties due to its ability to chelate Fe⁺⁺ inhibiting the formation of free radicals that cause oxidative stress.

Glycerolphosphoinositol (GPI Lysine): gained from lecithins in sunflower plants, has an innovative self-regulating mechanism of the inflammatory cascade resulting in an effective reduction of skin reactivity, without side effects.

Salicylic Acid: has keratolytic action, that promotes cell turnover. Also has astringent properties.

Propylene glycol: softens and dissolves cerumen for easier removal.

Clorexyderm® Oto Piu' has a pH 3

Instructions of use:

Apply into the ear canal, massage the base of the ear gently.
Wipe off any excess fluid using gauze or a clean cloth.
Repeat 1-2 times a week.

Packaging:

150 ml
